DETAILED ACTION

QUAYLE

This application is in condition for allowance except for the following formal matters:

Claim Objections

Claim 1 is objected to because of the following informalities:

Third limitation stated "a current controller for controlling current steering and at least one offset current in the differential amplifier **based at least in part upon the adjustment signal and a current steering control signal.**" It appears "**a current steering control signal**" should correctly be "a current steering variable signal ($S\alpha$)", see page 19, lines 2-12, since there is nowhere in the detailed description of the embodiments shown which signal called "a current steering control signal".

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
